

# HIGH IMPACT BARRICADE

## PRODUCT INFORMATION

- Impact resistant blow molded polyethylene legs and panels provide maximum durability
- Available in Type I, II configurations with Engineer Grade or High Intensity reflective sheeting
- Modular design allows for easy replacement of components
- Blow molded legs and panels provide maximum strength to minimize barricade damage during impacts and prevent sagging in extreme heat
- Combination metal hinge/bolt protector and steel reinforcing washer holds light firmly and securely in place
- Optional San-Fil panel holds up to 15 lbs. of sand and stabilizes the barricade without using messy sandbags
- NCHRP 350 approved with barricade light and San-Fil bottom panels
