WWF
Water-Wall Fence™

- Keep an area or construction zone secure with the new Water-Wall Fence™ by TraFFix Devices, Inc.
- Easily retrofits to the TraFFix Water-Wall to create an imposing and secure barrier to unwanted entries.
- Water Wall Fence is made of 11 gauge galvanized steel mesh providing security and visibility.
- Fence sections interlink with TraFFix Water-Wall to provide better overall stability and allows for changes in ground height.
- TraFFix Water-Wall and WWF can rotate up to 30° for easy layout and encircling of job sites.
- Additional hole provided at the upper end of T-Pin for security bolt to enhance security.
- No need to remove fence to fill TraFFix Water-Wall. Fill caps are easily accessible with fence installed.
- 6' Single or 12' Double Gate provides a secure entrance for workers or work vehicles.

PRODUCT BULLETIN

Ideal for vertical construction. Secure and easy to deploy.

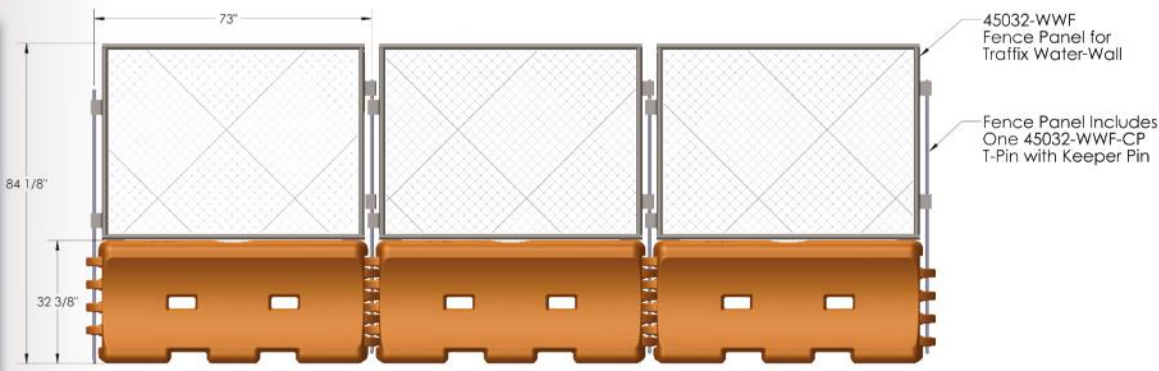

Water-Wall Fence™

Specifications

The chain link fence will attach to the top of a longitudinal barrier, (TrafFix Water-Wall™), creating additional security to a work zone. The mesh fence will be made of 11 gauge steel, connected to vertical steel posts of 1 5/8" diameter. Fence sections will be 6' wide x 4' tall. Each fence section shall weigh no more than 42 lbs including the connector T-pin. Each T-pin will extend down through the sections of fence into the knuckles of the TrafFix Water-Wall to securely connect the fence to the wall. Each T-pin shall have a hole at the upper end for a security bolt to enhance security. The fence will accommodate a 6' single gate or a 12' double gate for entrance or exit from the work zone. For maximum stability, the TrafFix Water-Wall, filled with water will weigh 1,110 pounds. Overall height of the Water-Wall Fence attached to the top of the TrafFix Water-Wall will be a minimum 84".

Water-Wall Fence Rotates up to 30° Degrees

T-Pin Connects Wall to Wall and Fence to Fence

Secure entry with a 6' Single Gate

Fence can be Screened for Greater Security
