

CHANNELIZING DRUMS

PRODUCT INFORMATION

- Available in rugged, durable high density polyethylene
- Available in impact resistant, re-shapeable low density polyethylene
- Five bases available: 25# molded recycled rubber, 40# molded recycled rubber, San-Fil, sand bag and tire sidewall
- Gentle curves throughout drum eliminate sharp edges or corners that crack or break when impacted increasing the longevity of the drum
- 360 degree wide lip insures drum and base remain “snapped together” while dragging and moving, yet releases easily upon impact
- NCHRP 350 approved
